

PROGET

**Mobility management
for businesses**

BEST PRACTICES

Apply policies

Prepare recommendations on the use of company mobile devices, develop data access protocols and define effective security measures.

Secure your network

Use VPNs and two-factor authentication (2FA) to protect your network and connections against unauthorized access.

Educate your team

Conduct regular training,
promote cybersecurity
throughout your organization,
and ensure your team has
constant access to security
best practices.

Improve processes

Manage remotely, simplify administrative processes, streamline workflow and increase the productivity of your IT team with a company mobile device management solution.

Can it get easier?

Managing mobility in business does not have to be a challenge. The Proget MDM system will streamline and seal processes. It will allow you to take remote control of your organisation's most important resources and manage them efficiently from a single console.
