

PROGET

**Does your
company need an
MDM solution?**

FIND OUT WHAT YOU CAN GAIN

Management optimization

Proget MDM will enable you to remotely and easily access your company's devices, data, configurations, reports, and user support provision – all from a single console.

Improved productivity

You will automate routine processes, allowing you to involve IT specialists in more advanced projects. In addition, the same team will handle an ever-growing number of devices.

Cost reduction

By applying appropriate policies, you will gain a tool to control data transmission while roaming and reduce expenses caused by accidental or unwanted data downloads.

Safe BYOD implementation

Thanks to the Personal and Work Profile, you can isolate company data and applications from the device's private zone, taking control of them and protecting them against potential threats.

Control over applications

The system will allow you to securely deliver applications, create lists of allowed programs, and block undesirable ones. You'll also maintain the latest version of your company's applications.

Compliance and safety

Thanks to Proget, you will meet regulatory compliance requirements. You can check the security status on an ongoing basis. If you lose your device, you can remotely block it or erase its data.
